Payroll

BENEFITS

Payroll Extensions for Microsoft Dynamics GP

Manage complex and changing requirements. Empower employees to handle complex and changing payroll requirements quickly and accurately through automation of routine tasks.

Ensure Fair Labor Standards Act (FLSA) compliance. Automate calculations of blended overtime rates to reduce errors due to manual calculations.

Reduce data entry. Create payable vouchers that post to the back office automatically at the time of payroll posting.

Streamline payroll processes. Automate the collection of employee advance balances at a later date, when the employee has sufficient pay.

Improve cash flow. Recover uncollected payroll deductions quickly and accurately.

Automate routine tasks and extend availability of all employee data with Payroll Extensions for Microsoft Dynamics™ GP. Maximize efficiency and reduce costs by tracking arrears deductions, calculating blended overtime rates, and automating the creation of payables to vendors of payroll deductions.

Manage complex payroll functions in a changing business environment efficiently and accurately, without adding to your overhead. Streamline your data entry to save time, reduce error, more efficiently comply with government requirements.

CALCULATE BLENDED OVERTIME RATES automatically by selecting pay codes.

EASILY AUTOMATE PAYMENTS from the Deductions and Taxes menu.

Microsoft Dynamics™ GP

Flexible Configuration	Set up your unique overtime calculation methods to meet the needs of your organization and remain compliant with the Fair Labor Standards Act (FLSA). The payroll system calculates employee overtime amounts accurately during payroll processing. Configure deductions based on business requirements.
Quick and Easy Setup	Provides fast and easy setup and updating your ever-changing human resource and payroll requirements is simple. Quickly set up and maintain payroll configuration by using the roll-down capabilities.
Automated Processes	Increase staff efficiency by automating payroll process steps, including tracking uncollected employee deductions, time-consuming blending of overtime rates, and entering payable transactions created in Payroll.
TIght Integration	Improve integration across Microsoft Dynamics GP, including Human Resources, Payroll, Accounts Payable, and other Financial Management modules.
Detailed Reports	Meet the ongoing need for human resource, payroll, financial, and audit information with detailed reports. The system also offers a SmartLists Report feature to help with one-time needs.
Full Microsoft Dynamics GP Product Support	Payroll Extensions for Microsoft Dynamics GP is fully tested, documented, and supported by Microsoft. All planned upgrades are available, as well as robust support by the award-winning Microsoft Support Services Team.
