

## Enable Offline Capabilities to Maximize Employee Productivity

Many organizations implement business application systems like Microsoft Dynamics AX 2009 to automate manual business processes. However, there are times when employees are out of the office in vendor meetings and not able to connect directly to their Dynamics AX system. When this happens, they do not have access to essential business data regarding on-going transactions and vendor relationship histories.

The Vendors Journal Snap-In allows an employee to quickly view and capture a complete view of your organization's relationship with a vendor from data in the Microsoft Dynamics AX 2009 system. Using a form created in Microsoft Office InfoPath 2007, this data can be taken to the meeting in order to view, add to or edit that data all while off of the network. Once back on the company network, the employee can easily update the changes into Microsoft Dynamics AX 2009.

By improving visibility and access to crucial business data, the Vendors Journal:

- Increases the productivity of meetings with vendors, providing access to important information when you need it.
- Increases the accuracy of your records by allowing you to update them while offline.
- Minimizes duplication of effort and possible errors in data entry by allowing you to upload those changes when you are back online.

A leading Microsoft Gold Certified IT consultancy and software development firm specializing in Microsoft Dynamics, Merit Solutions will launch the Dynamics AX 2009 Vendors Journal at Microsoft Convergence 2009 Booth #840.

Contact a Merit Solutions representative to learn about the integration capabilities of Microsoft Dynamics AX 2009 with Microsoft Office, MOSS, WSS and more!
